Jay Mahabal

I write code to create beautiful, performant, accessible, and meaningful experiences on the web. I'm looking for opportunities that are empathetic, use thoughtful design, and exist to better the status quo.

Experience

Sep 2025 - Current
New York, NY

Staff Software Engineer, Ironclad
- Plan roadmap for the Core UI team and lead sprint planning and retros
- Implement CSS standards across entire codebase using Stylelint
- Build and maintain Base UI-based component library

Apr 2024 - July 2025
New York, NY

Design Engineer, Modern Treasury
- Built, maintained, and migrated Radix UI-based component library
- Built UIs and fullstack features using Typescript and React

Jan 2020 - Apr 2024
New York, NY

Senior Software Engineer, Lattice
- Built UIs and fullstack features across multiple product verticals using Typescript, React, and Relay
- As Tech Lead for Design Systems, I maintained our React-based component library, managed stakeholder requests and a project management backlog, and wrote tools to understand component library usage.
- As UI Guild Lead, I led bi-weekly meetings for front-end leaning engineers and friends, developed a vision for UI at Lattice, and organized team bonding events.
- Partnered with Design to create a content writing style guide and wrote a blog post on the process
- Developed frontend loop interview question and rubric and onboarded interviewers

Aug 2018 - Jan 2020
Cupertino, CA

Frontend Engineer, Apple
- Built UIs for complex, data-rich web applications with React and GraphQL
- Contributed to shared component library

Mar 2017 - Aug 2018
San Francisco, CA

Associate Creative Technologist, AKQA
- Built projects using a variety of stacks, from CMSes like AEM, to template engines such as Handlebars and Contentful, to frameworks like React and Redux

Education

UC Berkeley
Graduated May 2016

B.A. Mathematics
Minor in Geographic Information Systems and Technology
Undergraduate Certificate in New Media
